EDUCATION

University of Massachusetts Lowell

B.S. in Computer Science, Mathematics Minor

Graduated May 2024

GPA: 3.7

EXPERIENCE

Clinical Assistant Analyst

August 2024 – Present

R3 Education

- Developed and refactored PostgreSQL queries using CTEs and subqueries in Access for clinical reporting analysis in Power BI and Google Sheets, improving efficiency in both the registrar and clinical departments.
- Architected Power BI OLAP models with DAX to track documentation deadlines in real-time compliance monitoring.
- Maintained internal databases and partnered with IT to troubleshoot system issues via QA and data cleansing.
- Improved FERPA-compliant student data processing workflows across 1K+ clinical rotations using Python (Ghostscript API), Google Apps Script, and VBA to ingest, compress, and route file payloads.

Data Labeling Specialist (Part-Time Contract)

August 2026 – Present

Workada

- Analyzed LLM outputs by assessing accuracy, relevance, and adherence to predefined criteria.
- Identified failure patterns, ambiguity, and data inconsistencies to improve annotation quality and model reliability.

Systems Integration Engineer (Part-Time Contract)

October 2025 – February 2026

Beyond Plastics

- Developed an ETL pipeline from Action Network CRM to Google Workspace using Google Apps Script, JSON data mapping, validation scripts, API fallbacks, and UAT to automate form entries across 8 subsheets.
- Managed user permissions, secured subsheets, and implemented smart chips to enhance security and interactivity.

Full-Stack Developer (Part-Time Contract)

May 2025 – June 2025

iQtransit

- Collaborated with engineers on DamageID's redesign by migrating from Laravel to a Dockerized WordPress website.
- Refactored PHP layouts and used CSS mediaqueries to ensure responsiveness across all screen-sizes.

Teaching Assistant & Learning Assistant

May 2023 – May 2024

University of Massachusetts Lowell

- Mentored 80+ students in full-stack development, WCAG accessibility, calculus topics, and refined jQuery exercises.
- Engineered an automated grading script with Jest and Excel, cutting grading time by 3 hours for 200+ assignments.

Web Developer

April 2023 – September 2023

Freelance

- Developed 3+ websites with Bootstrap and minified CSS techniques, leading Lighthouse performance scores to 97.
- Integrated CDN plugins to reduce load times by 1.2s and utilized Chrome DevTools to diagnose site issues.

PROJECTS

ComfortZone | [Link](#)

January 2025 – June 2025

- Built a job platform with TypeScript, React and .NET, utilizing Adzuna's API to index 1M+ job listings.
- Integrated Leaflet.js and Geoapify API to map nearby housing by job location for applicants while improving platform security using XSS mitigation and Snyk scans to track issues.

Animeta | [Link](#)

July 2023 – August 2023

- Engineered an anime management app using FERN Stack, Sentry, and Jikan API, integrating MUI and React-Scheduler components to assist in user's time management and improve component-style consistency.
- Utilized Firebase for cloud hosting and caching to reduce load times while validating API endpoints with Postman.

The Saving Portal | [Link](#)

January 2023

- Refactored a React and Selenium cashback monitoring app to a Flask architecture and improved data visualizations from 20+ platforms with EChartsJS while collaborating with engineers via Agile and Git.
- Utilized Figma for UI/UX design and prototyping, reducing development time by 4-5 hours.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, SQL, C/C++, R

Frameworks/Libraries: ReactJS, NodeJS, ExpressJS, Flask, Selenium, SFML, jQuery, Pandas, Pyplot

Dev Tools: AWS, Access, Active Directory, Firebase, Jira, Linux, Postman, Power BI, Power Query, WordPress

AI Tools & Automation: GitHub Copilot, Microsoft Copilot, Cursor, Claude, Zapier
